

Green Cross Code

Use it every time you cross the road.

Cut out the boxes below, either as one long strip or as two parts, and ask the beavers to put them back together in the correct order.

Look around both ways for traffic.
Use your ears to listen for traffic, as sometimes you can hear it before you can see it coming.

**Use your eyes
and ears**

Keep looking and listening whilst you cross.

Arrive alive

Think about where it might be safe to cross.
This may mean that you need to walk along the pavement. Have a look for safe places such as bridges, subways or crossings.

Think first

When it is safe to cross, make sure that you keep looking and listening as you *walk* across the road.

**Look and
listen**

STOP a little way back from the edge of the pavement at the place where it is safest to cross. STOP talking and start listening.

STOP

If traffic is coming wait until it has gone passed. If you are not sure whether it is safe then WAIT.

**Wait until it's
safe to cross**
